PROFESSIONAL SUMMARY

Full-Stack Web Developer specialized in JavaScript, Node.js, Express.js, React, and Next.js. Proficient in architecting RESTful APIs, designing scalable MongoDB schemas with complex relational patterns, and implementing secure JWT authentication. Demonstrated ability in building production-ready web applications with clean, modular code and optimized data pipelines.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C++, HTML5, CSS3
- **Frontend:** React, Next.js (App Router), Tailwind CSS, Redux, Context API, Axios
- **Backend:** Node.js, Express.js (v5), RESTful API Design, JWT Authentication, RBAC
- **Databases & Tools:** MongoDB, Mongoose ORM, Git, GitHub, VS Code, Postman, Bruno

FEATURED PROJECTS

Custom Stitching & Tailoring E-Commerce Platform

Full-Stack E-Commerce & Logistics Platform | Tech Stack: Node.js, Express.js (v5), MongoDB, Mongoose, React, Next.js

- **Architected RESTful API Engine:** Designed and built a feature-complete backend for custom garment stitching using Express 5 and Mongoose, supporting multi-role access for Customers, Tailors, and Admins.
- **Implemented Immutable Schema Patterns:** Built a subdocument snapshot model for customer body measurements, ensuring historical measurement data remains frozen and protected against future user profile edits.
- **Designed Multi-Stage Fulfillment Pipeline:** Modeled an end-to-end order tracking state machine from order placement and fabric pickup to cutting, stitching, trial, and final delivery.
- **Optimized Database Querying:** Applied indexing and automated Mongoose population hooks (pre(/^find/)) across customer, garment, and assigned tailor entities to minimize query latency.
- **Configured Role-Based Security:** Secured sensitive business operations and protected order endpoints using JWT bearer tokens and custom RBAC middleware (restrictTo).

Interactive Geospatial Travel Logger

Interactive Web Application | Tech Stack: React, React Router, Leaflet API, Reverse Geocoding API, Context API

- **Implemented Dynamic Map Navigation:** Integrated Leaflet with React Router to dynamically sync map coordinates (lat/lng) with URL query parameters, enabling deep-linking and stateful map panning.
- **Integrated Real-Time Reverse Geocoding:** Handled interactive map click events to fetch real-time location metadata (city, country, administrative region) from external spatial APIs.
- **Architected Provisional State Flow:** Designed a seamless UI pattern that stages prospective locations in provisional component state before persisting them to the global travel store via Context API.

Developer Portfolio & Interactive Showcases

Personal Developer Platform | Tech Stack: Next.js (App Router), React, Tailwind CSS

- **Modern App Router Architecture:** Engineered a responsive, performance-focused personal site utilizing Next.js Server Components for static performance and Client Components for interactive elements.
- **Modular UI Engineering:** Designed clean, accessible UI components with Tailwind CSS, showcasing full-stack projects, architecture breakdowns, and direct contact integration.

EDUCATION

Bachelor of Technology (B.Tech) in Mechanical Engineering

Netaji Subhash University of Technology, Delhi, India | Graduation Year: 2026
